Yandex Practicum

Front-end developer (education)

► Diploma project - Filmopoisk
Deployed: https://kino.nomoredomains.club/
Stack: React, JavaScript, NodeJs, MongoDB, REST Api
Description: App with registration and authorization, there is feature of movie search in the DB, saving the movie to favourites. App has responsive layout down to 320 px width.
Repo front: https://github.com/Iluxmas/movies-explorer-frontend
Repo back: https://github.com/Iluxmas/movies-explorer-api

► Project #1 - Resume page
Link: https://iluxmas.github.io/resume/
Stack: React, JavaScript, Webpack
Description: My pet-project where I gathered all information about me in one page, for easier sharing

with recruiters. It has RU and EN version, EN loading when you device language is not RU. Page is adaptive and I also tried to keep design light. Follow the next link to find more info.
Repo: https://github.com/Iluxmas/resume

► Project #2: Mesto App
Stack: JavaScript, API, Webpack, Express, MongoDB, Git
Description: Project theme was photo social network. Template was taken from Figma. Page is adaptive, size and position of elements depends on screen size. ApiService class component responsible for server-client interaction. Bundling made with Webpack. Later project was ported to React, backend was configured on Express, MongoDB was used as database.
Repo: https://github.com/Iluxmas/mesto

► Project #3 : Todo list app
Stack: React.js, JavaScript, Jest
Description: Application todo list. Project was done using React, including Hooks and Class components. At the moment some components are covered with various tests. Features: adding\deleting todos, marking as important\done, filter by name or state.
Repo: https://github.com/Iluxmas/To-do-app

► Project #4 : How-to-learn
Stack: HTML, CSS, BEM, Git, Figma, JS
Description: Project theme was Education Techniques. To create this page I implemented some new knowledges about markup language and css flex. Files organization was made according to BEM nested methodology. Language switch was made with JS.
Repo: https://github.com/Iluxmas/how-to-learn

► Project #5 : Russian travel
Stack: HTML, CSS, SCSS, BEM, Git, Figma
Description: Project theme was russian travel, template was taken from Figma. Page is adaptive, size and position of elements depends on screen size through media queries. Grid and flex both were used. For styles SCSS was used with further conversion to css.
Repo: https://github.com/Iluxmas/russian-travel

All projects were code-reviewed.

Further information

About me

I am Frontend Developer and since 2022 based in Marmaris, Turkey. My background is a chemical technology, job at Siegwerk, world's leading ink supplier, gave me great experience in project managing, product development and business oriented thinking. But, since my big interest in maths and phisics, I was always dreaming about coding, programming always was a part of me. I choose Frontend cause I have great sense of beauty. Day-to-day websurfing just show that good FE developers is still in need. Also I love challenges and to solve puzzles, because don't like questions without an answer. I am really happy that I can bring my vision, skills and experience to the WEB",

Love snowboarding at winter, bicycle trips in summer, rock climbing and traveling, 32 countries at the moment.
